(ROANOKE, VA, March 20, 2018) - Luna Innovations Incorporated (NASDAQ: LUNA), a leader in advanced optical technology, today announced its financial results for the fourth quarter and year ended December 31, 2017.

"We are extremely pleased about our continued progress strategically and operationally, which resulted in our strong financial performance both for the fourth quarter and the full year ended December 31, 2017," said Scott Graeff, President and Chief Executive Officer of Luna. "We delivered \$0.7 million in income from continuing operations for the fourth quarter of 2017 when normalized for the \$0.7 million one-time charge related to the departure of My Chung. We achieved double-digit growth in revenues year over year and recognized positive income from continuing operations for the fourth quarter. I'm incredibly proud of the whole Luna team, whose sharp focus allowed us to deliver these results. The demand for our test and measurement products is growing and this was reflected in our robust fourth quarter and 2017 full year results. Silicon photonics and its applications in high speed networks and data centers is driving the telecommunications test segment, and our ODiSI platform continues to gain traction with the ever-expanding use of composite materials in manufacturing. We believe the macro trends behind the growing demand in these markets leave us well positioned to continue our growth into 2018 and beyond."

Total revenues for the three months ended December 31, 2017, were \$13.2 million, compared to \$11.8 million for the three months ended December 31, 2016. Technology development revenues grew to \$5.1 million for the three months ended December 31, 2017, from \$4.5 million for the three months ended December 31, 2016. The company recognized income from continuing operations of \$0.2 million for the three months ended December 31, 2017, compared to \$0.3 million for the three months ended December 31, 2016. Adjusted earnings before interest, taxes, depreciation and amortization ("adjusted EBITDA") was \$1.2 million for the three months ended December 31, 2017, compared to adjusted EBITDA of \$1.0 million for the three months ended December 31, 2016. Non-GAAP Measures

In evaluating the operating performance of its business, the company's management considers adjusted EBITDA, which excludes certain charges and credits that are required by generally accepted accounting principles ("GAAP"). Adjusted

EBITDA provides useful information to both management and investors by excluding the effect of certain non-cash expenses and items that the company believes may not be indicative of its operating performance, because either they are unusual and the company does not expect them to recur in the ordinary course of its business or they are unrelated to the ongoing operation of the business in the ordinary course. Adjusted EBITDA should be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for, or superior to, GAAP results. Adjusted EBITDA has been reconciled to the nearest GAAP measure in the table following the financial statements attached to this press release.
